

## Hiltech Rose Cutter

This machine is especially designed to clear the path and shorten overhanging roses between rose beddings. You will have easy access into the path again and also the bottom of the vegetation is better attainable for crop protection.

The Rose cutter with fuel engine is extensively tested in co-operation with rose cultivators in Holland.

The frame of the Rose cutter with fuel engine is made of aluminium to reduce the weight. This machine has only one wheel, which makes it very manoeuvrable. Through the use of a fuel engine you won't suffer any inconvenience from extension cords and also while using the Rose cutter you can walk up straight, up and down the path. **Besides preventing serious back problems you will save a considerable amount of time.** The wheel is equipped with a polyurethane tyre, which makes it impossible to get a flat tyre.

The Rose cutter is constructed as compact as possible which makes it very easy to handle in the narrow path between the rose beddings. The cutting angle and the height of the cutting blades are adjustable.

The cutting unit is revolving, this makes it easy to start the engine and you don't have to turn the Rose cutter in the back of the narrow path to cut the other side. You can shift the cutting blades from one side to the other so you can cut the other side of the path walking backwards.

De Hiltech RS75-4T is equipped with a Honda 4-way motor the swept volume of the cylinder is 25 cc.

The cutting length of the blades is 72 cm.

The total weight of the machine is 13,8 kg.

The Rose cutter will be supplied with:

- 1 Hiltech RS75-4T Rose cutter.
- 1 jerry can Aspen 4T environmental friendly fuel.
- 1 special funnel with adapter for Aspen-jerry can.
- 1 spray can Agialube biological cutting blade spray.
