

Spring hose reel

Pulling the hose on the path results in damage to the hose and the crop.

This won't happen by using the spring hose reel. The spring hose reel will be placed next to the path where you do the spraying. When you pull the hose, the spring will be activated. On the way back the hose automatically winds up, while you are spraying.

Product details

- galvanised design
- measures 76 x 45 x 90 cm (l x b x h)
- easy to relocate
- suitable for max. 50 meter high pressure hose
- carried out with ball-bearings
- special, very light high pressure hose

**So don't waste your energy by pulling the hose,
but chose for our spring hose reel.**
